PROFILE

A motivated computer science student eager to apply my knowledge in software development and programming to real-world projects. Focused on continuous learning and teamwork, with a passion for solving complex problems and delivering high-quality software solution.

PROJECTS

Book Store Application (MERN Stack)

TEAM LEAD

- Designed and built a full-stack web application for managing books, users, and orders using the MERN stack.
- Implemented RESTful APIs to enable seamless communication between front-end and back-end systems.
- Ensured scalability and user-friendly functionality for improved application performance.

Diabetes Prediction System

- Created a machine learning-based system using algorithms to predict diabetes from healthcare datasets.
- Developed a user-friendly interface with Streamlit and optimized for scalability.
